

Genesis Directional Radar

Genesis Directional Radar

The Genesis hand held radar combines superb build quality & impressive specification. It is ideal for Speed Watch initiatives as well as general speed monitoring.

Direction sensing technology allows the operator to select the direction of traffic flow, given easier target selection even in heavy traffic flows. Supplied with a waist mounted Leather Housed power pack which will give >12 hours continuous operation between charges.

The easy to read, rear mounted display and control panel gives the operator easy control of the unit in all conditions and the rugged impact resistant housing provides solid operation in all environments.

This device is fully compliant to EN301489-3, EN300440-1 & EN60950-1 for legal operation within the UK.

Always ensure hand held radar units have OFCOM recognised compliance for legal operation here in the UK

Specification

Audio Doppler
Target Direction selection
Accuracy +/- 1 mph/kph
Frequency 24.2 GHz
Operating Temp -30 to +40C
Fully weatherproof

Auto backlit Display
RFI detector
Speed range 12-210 mph/kph
Tuning Fork 33 mph
Weight 650g

Holds full UK OFCOM compliance EN301489-3, EN300440-1, EN60950-1
