

Dual Message Display

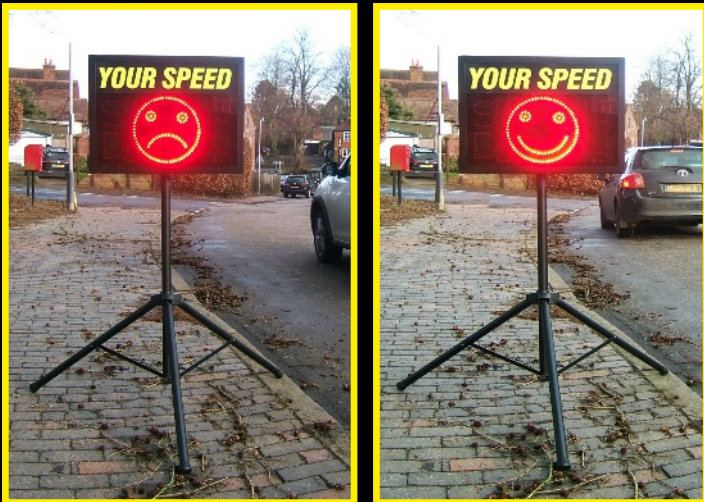

Dual Message Display

The dual message display designed and built by Unipar Services is intended for Speed Watch initiatives, councils and private operators with internal road networks to monitor. It has become one of our most popular products for portable roadside traffic calming and driver awareness campaigns.

When activated the display will show both the vehicles speed alternating with a 'SLOW DOWN' command (there is also the option of showing just the vehicle speed or just the SLOW DOWN command if preferred).

New for 2018!! We can also provide a Smiley Face option which is activated when drivers are below the speed limit. Those over will activate a Sad Face intermitantly with vehicle speed. This may be an after sales option to existing customers!

The standard display is powered by a rechargeable 12V power pack which will provide around 12 hours operation between charges and its normal operational range is up to 100m.

The kit is compact enough to be housed in its hard carry case (supplied) when being transported or stored. We also offer several upgrades such as data logging, permanent outdoor configuration and semi-permanent pole mounted operation with a secure, heavy duty battery box. Please enquire for further information.

Specification

Construction: Aluminium Housing & Impact Resistant Poly carbonate
Width 610 mm Height 470 mm Depth 43 mm
Weight 7 Kg (Ex Battery)
Sign-Fix Channel fixing/ Tripod Brackets
Numeral Height 260 mm Super Bright LED. Character Height 100 mm Super Bright LED
Auto dim control
Duty Cycle up to 12hrs. Power 12Vdc. Recharge Time Up to 6hrs
